Application/Control Number: 08/926,246 Page 2

Art Unit: 3711

In view of the Remand by the Board of Appeals, (paper 28) the finality of the rejection of the last Office action is withdrawn.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The 08/070,510 application from which applicant claims priority for the claimed subject matter does not enable the claimed subject matter.

Each of the following has been identified by the examiner as non-enabled subject matter:

1. In claim 1, the lower limit on the core diameter (29 mm), the upper limit on the core specific gravity (1.4), the lower limit of the intermediate layer thickness (1 mm), the upper limit of the specific gravity of the intermediate layer (1.2), the lower limit of the hardness of the intermediate layer (85 on JIS C), and the upper limit of the thickness range of the cover being claimed (3 mm) are not enabled.

As an example the upper limit on the thickness range of the originally disclosed cover was 1.27 mm.

Application/Control Number: 08/926,246

Art Unit: 3711

- 2. In claim 3, there is no basis provided for the applicant's reasoning that the now claimed hardness range of the cores and covers was inherent in the original disclosure. Without a basis in the original disclosure the now claimed ranges must be considered non-enabled.
- 3. In claim 5, the lower limit of the diameter of the center core being claimed (29 mm) was not disclosed in the original disclosure. The lower limit originally disclosed was 35.052 mm.
- 4. In claim 6, neither the upper or lower limit of the claimed difference in the specific gravity (.5 .1) was disclosed in the original disclosure. By applicant's admission the limits of the difference disclosed were (.234 .164).
- 5. In claim 7, neither the upper limit (1.0) nor the lower limit (.9) were disclosed in the original disclosure. While values within that range were disclosed they do not make inherent the upper and lower bounds of the claimed range.
- 6. In claim 8, neither the upper limit (100) nor the lower limit (85) were disclosed in the original disclosure. While values within that range were disclosed they do not make inherent the upper and lower bounds of the claimed range.

Claims 1-8 of this application have been copied by the applicant from U. S. Patent No. 5,553,852. These claims are not patentable to the applicant because they are not enabled under 35 U.S.C. 112 1st paragraph.

Application/Control Number: 08/926,246

Art Unit: 3711

An interference cannot be initiated since a prerequisite for interference under 37 CFR 1.606 is that the claim be patentable to the applicant subject to a judgement in the interference.

Because the earliest date from which the applicant can claim priority for the claimed subject matter is the filing date of the instant application the following rejection applies:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Higuchi '043.

Any inquiry concerning this communication should be directed to Mark S. Graham at telephone number (703) 308-1355.

MSG May 9, 2002

Mark S. Graham

prosecution. Mully

Attachment for PTO-948 (Rev. 03/01, or earlier) 6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the Notice of Allowability. Extensions of time may NOT be obtained under the provisions of 37 CFR 1 136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson. MUST be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings MUST be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
